

Triafreeze - EG

Triafreeze EG is an ethylene glycol based automotive antifreeze, formulated to optimize heat transfer while protecting against freezing and corrosion damage. **Triafreeze EG's** balanced mixture of corrosion inhibitors protect against cavitation and erosion to ensure the long life of your engines.

PRODUCT SPECIFICATIONS

Color	Fuchsia
Appearance	Clear, single phase
Ethylene Glycol (%wt)	95 min
Inhibitors/Water (%wt)	5 max
Specific Gravity (60°F)	1.125 - 1.135
Corrosion Package	Nitrite/Molybdate/Triazol
pH, 50% by volume	8.5 - 10
Freezing Pt. 30% EG (vol)	4°F
50% EG (vol)	-34°F
Boiling Pt. 30% EG (vol)	220°F
50% EG (vol)	225°F
